

Build better legal documents faster

Word LX™ is a template management, document assembly and document formatting solution that transforms Microsoft® Word into a simpler and more efficient tool for creating legal documents

Why Word LX?

Word LX makes it easy for law firms to deploy automated firm branded templates to everyone in the firm. It contains legal specific formatting and editing tools that make document creation faster and easier. The end result is high quality, properly formatted legal documents every single time.

Save your lawyers and staff up to 1 hour per day with document creation

Improve Consistency

Produce consistently branded, well formatted legal documents

Save Time

Create documents faster with automated templates, clause libraries & advanced editing tools

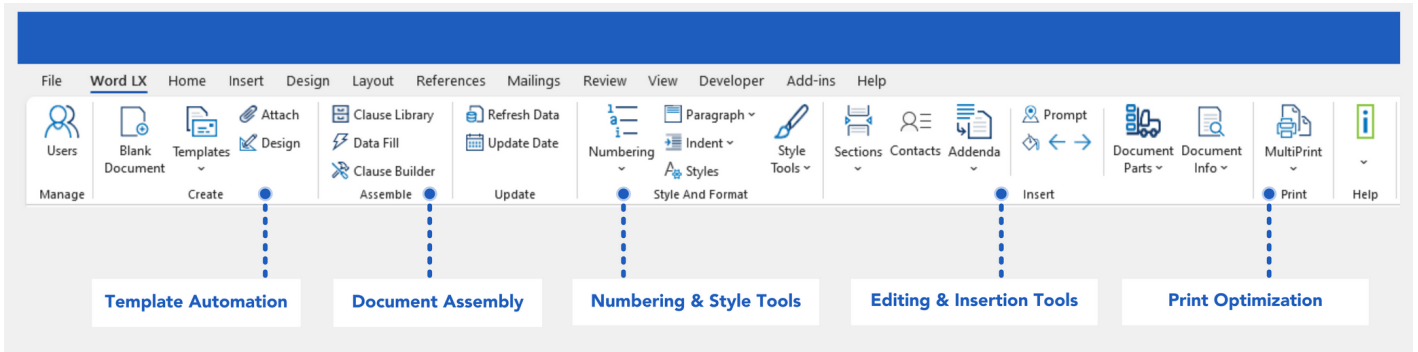

Stay Competitive

Streamline workflows and service clients more efficiently

"Word LX allows us to automate and standardize our document creation processes, allowing us to deliver more efficient service to clients"
